PHP

PROFILE

I'm a **Full-Stack Software Engineer** who built and published two production apps on Google Play: **Lavabes Online Shopping** and **LavaGO Delivery**. I designed and developed the entire system end-to-end from Android apps to Laravel backend including payment, logistics, and live hosting. My biggest achievement is launching real marketplace and delivery platforms used by real users. I'm driven by building scalable systems and skilled in Android (Java), Laravel, API & system integration, MySQL, and production deployment.

EMPLOYMENT HISTORY

Full Stack Software Engineer, Lavabes Empire

2026, Batu Berendam, Melaka

Developed and deployed the Lavabes Online Shopping marketplace and the LavaGO delivery ecosystem, creating both backend and android apps using laravel,MySQL and Java, managing database hosting on Hostinger and releasing the applications on the Google Play Store.

DevTech Analyst, Legoom Solutions and Consultancy

May 2022 — Jul 2022, Kajang, Selangor

Designed and developed a Laravel based backup application for Legoom Solutions and Consultancy, leveraging PHP and MySQL while gaining hands-on experience in database management and data storage.

EDUCATION
